

# Moodboard – Portfolio

Erin Hirschberger

Might change this still  
looking for best color but  
it'll work for now

# Color Scheme

I chose a mostly monochromatic color scheme with blue since I consider it a calming color and I've used it on most pages and think it gives the vibe I want to have associated with my portfolio. I also have red on the page since it will work well for contrast and to aid in dividing up the page without being too sudden (looking for the exact right shade but it'll most likely be a red shade)
